Structural Concrete

Journal of the *fib*

Structural Concrete, the official journal of the fib, provides conceptual and procedural guidance in the field of concrete construction and features peer-reviewed papers, keynote research and industry news covering all aspects of the design, construction, performance in service and demolition of concrete structures.

Advertising Deadline
November 3rd , 2014

Publishing Date:
December 2014

Structural Concrete is seeking original papers of the highest quality for publications. Papers will cover all aspects of the design, construction, performance in service, strengthening and demolition of concrete structures, including papers on research into the behavior of structures and into the development of design methods. All papers will be subjected to a rigorous peer review process prior to acceptance for publication.
The journal has a dual focus: half the published papers deal with practical issues such as construction methods or case studies of particular projects while the other half concentrate on research and development.

Frequency: 4 issues per year – March, June, September, December
Language of Publication: English
Publisher: fib - International Federation for Structural Concrete
Publishing House: Wilhelm Ernst & Sohn Verlag für Architektur und technische Wissenschaften GmbH & Co. KG
Annual subscription print ISSN 1464-4177; personal 130,00 Euro; institutional 498,00 Euro
Annual subscription print + online ISSN 1751-7648; personal 151,00 Euro; institutional 575,00 Euro

Topics of issue 4/2014

- fib Model Code 2010
- Eurocode
- analysis and design methods
- anchorage
- art of engineering
- bridge construction
- building maintenance / refurbishment
- building materials | construction materials
- corrosion
- design and construction
- dynamic actions / earthquakes
- fire protection
- general
- history of building
- prestressed concrete
- reinforcement
- standards, regulations, guidelines, directives
- testing | experiments
- tunnelling
