VI. Recently Published Books

Kurrer, Karl-Eugen: Geschichte der Baustatik. Auf der Suche nach dem Gleichgewicht. 2nd revised and enlarged edition, 1200 pp., Ernst & Sohn, Berlin 2016.

The author analyses the history of theories of structures which are relevant for construction engineering. Whereas the first edition of the book (2002) was focused mainly on the development in Germany, the new book is dedicated to international comparison. In fact the number of pages was nearly doubled to the first German edition; the English edition of 2008 was enlarged by more than thirty percent. The monograph is the definitive book in this field.

VII. Join ICOHTEC

An ICOHTEC membership makes you a member of the scholarly network of the UNESCO-based International Committee for the History of Technology, ICOHTEC.

The membership includes:

- Reduced fees for ICOHTEC's conferences
- ICOHTEC's reviewed journal ICON (published annually, ca. 200 pages)
- Electronic access to back issues of ICON (published since 1995)
- ICOHTEC's electronic Newsletter (published monthly – available via mailing list and on the homepage)
