

Characteristics:

- International journal for steel construction in research and practice
- Membership journal of the ECCS – European Convention for Constructional Steelwork
- Publication of peer-reviewed papers
- Distinguished Editorial Board
- Dissemination of substantiated expert knowledge

The international journal Steel Construction – Design and Research publishes peer-reviewed papers covering the entire field of steel construction research and engineering practice, focusing on the areas of composite construction, bridges, buildings, cable and tension structures, façades, glass and lightweight constructions, also cranes, masts, towers, hydraulic structures, vessels, tanks and chimneys plus fire protection. Steel Construction – Design and Research is the engineering science journal for structural steelwork systems, which embraces the following areas of activity: new theories and testing, design, analysis and calculations, fabrication and erection, usage and conversion, preserving and maintaining the building stock, recycling and disposal. This journal is therefore aimed not only at academics, but in particular at consulting structural engineers, and also other engineers active in the relevant industries and authorities.

The high quality of the papers is ensured by a scientific editorial board made up of internationally renowned researchers and practising engineers.

Editor-in-chief:

Dr.-Ing. Karl-Eugen Kurrer, Ernst & Sohn

Volume:	11 / 2018
Trim size:	210 mm x 297 mm, DIN A4
Type area:	181 mm x 262 mm
Method of printing:	offset
Material required:	electronic data – high-resolution PDF
Mailing address for bound inserts, losse inserts:	printing company on request
Frequency:	4 issues per year: February, May, August, November
Total print run:	3,000 copies
Society:	ECCS-CECM-EKS 32, av. des Ombrages, bte 20 1200 Brüssel, Belgien
Publisher:	Wilhelm Ernst & Sohn Verlag für Architektur und technische Wissenschaften GmbH & Co. KG Rotherstraße 21 10245 Berlin, Germany www.ernst-und-sohn.de
