Fernando Stucchi, Hugo Corres Peiretti, Sergio Doniak, Jose Martin, Marcelo Ungaretti, Gilson Fujii
Corinthians Arena: General concepts and the application of precast concrete in Brazilian arenas for the 2014 World Cup

Stefanie von Greve-Dierfeld, Christoph Gehlen
Performance-based durability design, carbonation Part 3: PSF approach and a proposal for the revision of deemed-to-satisfy rules

Fabio Brantschen, Duarte Faria, Miguel Fernández Ruiz, Aurelio Muttoni
Bond Behaviour of straight, hooked, U-shaped and headed bars in cracked concrete

Chunxiang Qian, Yi Zhang, Haoliang Huang, Jun Qu, Jingqiang Guo
Influences of superplasticizers on basic and drying creep on concrete

Sabahattin Aykaç, Ilker Kalkan, Tugrul Tankut
Flexural strengthening and repair of RC slabs by adding a new RC layer

Joan Casas, Sergi Villalba
New structural joint by rebar looping applied to staged box girder bridge construction. Static tests

Aliakbar Maghsoudi, Mohammad Maghsoudi, Arash Ali Heshmati
The monitored and theoretical ultimate moment and ductility of pre-tensioned HSSCC bridge girders

Yuguang Yang, Joop den Uijl, Joost Walraven
The Critical Shear Displacement theory: on the way to extending the scope of shear design and assessment for members without shear

Krystyna Nagrodzka-Godycka, Tadeusz Godycki-Ćwirko, Ryszard Wojdak
Reinforced concrete thin wall dome after eighty years of operation in maritime climate environment

Makato Yanaka, Seyed Hooman Ghasemi, Andrzej Nowak
Reliability-based and life-cycle-cost oriented design recommendations for prestressed concrete bridge girders

Piero Colajanni, Antonino Recupero, Nino Spinella
Increasing the flexural capacity of RC beams using steel angles and pre-tensioned stainless steel ribbons
Emmanuel Ferrier, Laurent Michel, Confrere Adeline, Gilles Chanvillard
Experimental behavior and deflections of low strength concrete beams reinforced by FRP bars

Chau-Khun Ma, Abdullah Zawawi Awang, Reyes Garcia, Wahid Omar, Kypros Pilakoutas
Behaviour of over-reinforced high-strength concrete beams confined with post-tensioned steel straps: an experimental investigation

Fabio Di Carlo, Alberto Meda, Zila Rinaldi
Design procedure of precast fiber reinforced concrete segments for tunnel lining construction

Diogo Figueira, Carlos Sousa, Rui Calçada, Afonso Serra Neves
Design recommendations for reinforced concrete interfaces based on statistical and probabilistic methods

Qiang Yu, Jia-Liang Le, Mija Hubler, Roman Wendner, Gianluca Cusatis, Zdenek Bazant
Comparison of main models for size effect on shear strength of reinforced and prestressed concrete beams

Anh Nguyen, Frank Jesse, Manfred Curbach
Experiments about load bearing behaviour of lightweight sandwich beams using textile reinforced and expanded polystyrene concrete

Dominic Desnoyers, Jean-Philippe Charron, Bruno Massicotte, Pierre Rossi, Jean-Louis Tailhan
Influence of reinforcement type on macrocrack propagation under sustained loading in steel fibre reinforced concrete
